

Smart Retail Kiosk

# EZ SIM

**Product Information**

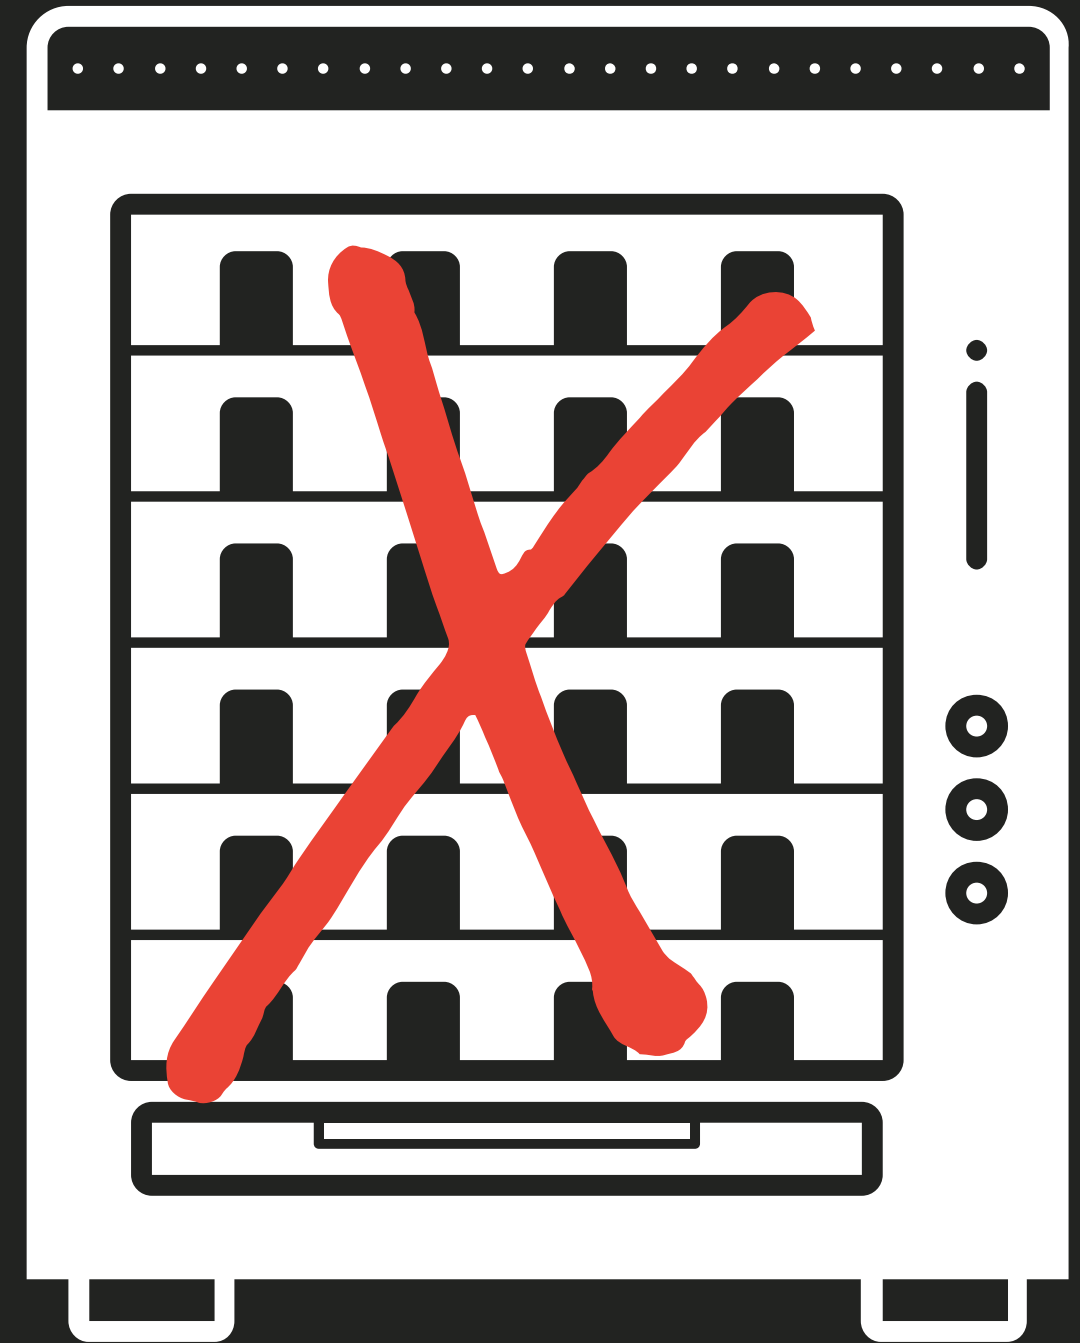

# Its not just vending

## FULLY AUTOMATED KIOSK

EZ SIM is not ordinary vending. It is a fully automated interactive self serve kiosk, that processes customer information, activates a SIM card and dispenses a "Ready to Use" SIM card.

# Hardware Features

## COMPACT DESIGN

Sleek and uses up minimal space.

Easy to setup, move and relocate.

24" x 30" x 72"

## BIG SCREEN

42" screen for IDLE time advertisements and for customer interactions

## OTHER FEATURES

SIM Dispenser , CASH Acceptor, Debit/Credit Acceptor,  
Receipt Printer, Proximity Sensor

# Software Features

## UI FOR CUSTOMERS

Customizable software where customers can choose from available services, enter required information and pay. Friendly UI will make using the kiosk as easy as using an APP on your smart phone.

## API INTEGRATION

API calls are used to communicate with carrier's system for processes such as getting the phone number and activating the SIM card.

## REMOTE MONITORING & CONTROL

Units can be remotely monitored and controlled. Health status of each component, inventory, cash status, and all real time transactions are available in back end software. Real time alerts for system errors are also generated.

# Adding Features and Customization

## EASY TO CUSTOMIZE

Software is based on Android platform and is very easy to customize as per carrier needs.

## ADDING FEATURES

Any software related feature can easily be added to the current software. Ex. purchasing an accessory & getting it shipped to the address provided.

## INTEGRATE WITH OTHER HARDWARES

Software can be integrated with other hardwares such as OTP Lockboxes. Customers can purchase products like Mobile Devices & Accessories.
